

SAH TRACK™

TRACK TIG

RADIAL ANGIOGRAPHIC CATHETER (TIGER 5F)

An angiographic or diagnostic catheter is intended for use in angiographic procedures. It delivers radiopaque media and therapeutic agents to selected sites in the vascular system. It is also used to lead a guide wire or a catheter into the target site.

Features:

High-torque design and precise manipulation

The catheter's ultra-thin wall creates a large lumen to enable a short injection time²

The Tiger curves enable angiography of right and left coronary arteries using either a radial or brachial approach. This single catheter concept decreases procedure and fluoroscopy
